Furniture pads

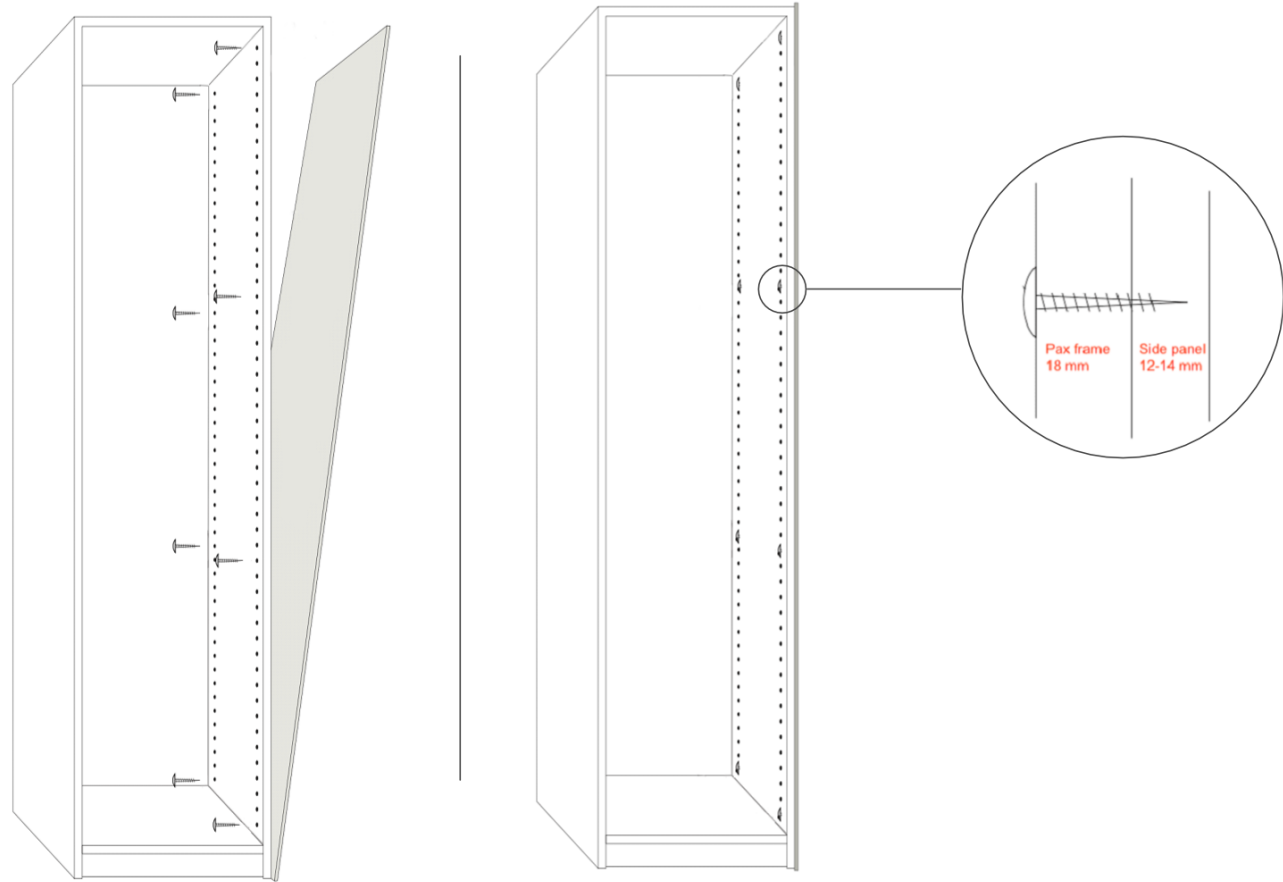

NOTE! For safety reasons, make sure to always attach your storage unit to the wall.

# NOREMAX

## Pax- Side panel Mounting instructions

Place the side panel in position.  
Note! The side is wider than the Ikea  
frame, to cover the thickness of the door  
front. Please control thickness of door  
front. The side should protrude so it's  
in line with door fronts.

Use mounting screws from the inside of  
the frame to attach the side panel. 8-10  
screws are enough.  
**IMPORTANT!** Do not screw through the  
thickness of the whole side.  
See picture below as guideline

**NOTE!** For safety reasons, make sure to always attach your storage unit to the wall.
